DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-11 are rejected under 35 U.S.C. 102(b) as being anticipated by Horne, U.S.

Patent No. 4,887,296. Referring to claims 1-8, 10, 11, Horne discloses a cryptographic broadcast system wherein common key (media key), that is used to encrypt a data signal, is encrypted using an individual key (device key) that is an encrypted receiver address number (sequence of numbers) (Col. 3, lines 53-68), which meets the limitation of encrypting each key in the sequence of media keys with a respective device key associated with the respective number. Means are available for selecting each receiver node in a sequence and for generating the individual key for the selected receiver node (Col. 4, lines 8-15), which meets the limitation of altering the media key with each of a sequence of numbers to render a sequence of media keys.

Referring to claim 9, Horne discloses that the encryption system utilizes exclusive or operations (Col. 2, lines 47-48).

Double Patenting

3. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

Art Unit: 2132

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

4. Claims 1-11 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-26 of U.S. Patent No. 6,118,873. For example, claim 1 of the above-mentioned patent is analogous to claim 1 of the current application for the following reasons: the session key of '873 reads on the media key of the current application and both are altered using a plurality of numbers to create a key block, the keys in the key block are then encrypted using device keys, and the encrypted keys are then transmitted to the designated devices so that the keys and data can be decrypted.
